## Ova & Parasite (#410)

Microscopy			
	Sample I	Sample II	Sample III
<b>Ova/Parasites</b>	Blastocystis hominis	Blastocystis hominis	Blastocystis hominis
<b>Trichrome Stain</b>	Blastocystis hominis	Blastocystis hominis	Blastocystis hominis

Each stool sample was prepared for microscopic evaluation on wet mount and trichrome stains, utilizing resource-intensive techniques to aid in the analysis and detection of organisms. Yeast, when visibly identified, is reported in terms of predominance on the sample. If 'QNS' is reported, the patient's sample was inadequate for testing purposes.
