REPORTED:

Test Name	Result	Flag	Reference Range	Lab
MYELOPEROXIDASE ANTIBODY				
MYELOPEROXIDASE ANTIBODY	<1.0		AI	01
Value	Interpretation			
-----	-----			
<1.0	No Antibody Detected			
> or = 1.0	Antibody Detected			

Autoantibodies to myeloperoxidase (MPO) are commonly associated with the following small-vessel vasculitides: microscopic polyangitis, polyarteritis nodosa, Churg-Strauss syndrome, necrotizing and crescentic glomerulonephritis and occasionally Wegeners granulomatosis. The perinuclear IFA pattern, (p-ANCA) is based largely on autoantibody to myeloperoxidase which serves as the primary antigen.

These autoantibodies are present in active disease state.
